

J-3000 Gas Jet

The J-3000 is great for large lines and long runs, as well as small lines. And it's much more powerful than smaller jets. A 3000 psi, 4 gallon per minute triplex pump with Vibra-pulse® on demand drives the hose easily around tight bends and down long runs. The pump is powered by a reliable 13 hp "Quiet Drive" Honda engine attached to a 2 to 1 gear reducer to extend the life of the pump. There's even an easy access control panel that lets you switch from jetting to pressure washing with the turn of a knob.

Standard safety features include a thermal relief valve to protect the pump from heat damage, along with a backflow check valve and inlet filter. A removable 300 ft. capacity hose reel with drag brake, reel lock and brass swivel is mounted on a heavy duty frame with four pneumatic tires. A wheel brake keeps the machine solidly positioned on the job. Complete with tool box, chemical injector, and spray wand with trigger. Electric start, LP fueled, and 220v/3 phase models available.

Our most popular gas jet.

J-3000 Specifications:

Pump:

Triplex w/Vibra-pulse®

Pressure:

3000 psi

Flow:

4 gpm

Engine:

13 hp w/Low oil shut off, and gear reducer

Hose Reel:

Removable, brass swivel, drag brake and reel lock, 300 ft. x 3/8" capacity

Weight:

203 lbs. (92 kg)

Dimensions:

40" L x 24" W x 42" H
(102 cm x 61 cm x 107 cm)

HR-200-W Handy-Reel with Foot Pedal

For use with any jet, the compact 200 ft. capacity Handy-Reel can be attached to a gas jet so you can use the power of the gas unit inside a building. Or it can be taken up on a roof to clear vents while your Jet sits securely on the ground. The foot pedal gives you added safety. Water flows when you step on the pedal and stops when you lift your foot, so you have both hands free at all times to control the hose. The foot pedal is also available separately.
